

# Latest price trends of solar inverters

## Overview

---

The pricing of solar PV inverters has shown a downward trajectory over the past decade due to advancements in manufacturing, economies of scale, and increased competition. As of 2025, the average price per watt for inverters ranges between \$0. By application, utility-scale installations accounted for 62.25% of the solar PV inverter market size in 2025, while residential is set to grow at. This article discusses inverter price trends for solar and non-solar options, each with specific needs.
