

# Local solar power supply system

## Overview

---

Local solar uses smaller, distributed facilities that produce power closer to the homes and communities where it's being used. The two most common forms of local solar are community solar and rooftop solar. Enter your zip code below to find a certified installer near you. [Click for more information »](#) . By harnessing power generated on rooftops and in our communities, we can quickly bolster our energy supply, improve grid stability, and reduce costs for everyone, all while ensuring this new energy demand is met with carbon-free resources. Vote Solar champions local clean energy solutions through. Need to find a solar installer for one of our systems?

Choose from our Residential Roof or Ground Mount systems and use our Dealer Locator below to find a contractor near you. It'll include product and labor costs along with financing options to fit your.
