

Lockheed martin clean energy facility

Overview

Lockheed Martin opened its Andover facility in 2020 to develop GridStar Flow, a long-duration battery for the clean energy sector. Combining three separate operations into one, the GridStar Flow program recently moved to a cutting-edge facility in Andover, Massachusetts, where employees in labs, production and program management will collaborate to drive this new technology in. Lockheed Martin will lay off 64 workers at its Andover laboratory by July 5, according to a Worker Adjustment and Retraining (WARN) Act notice filed with the Massachusetts Department of Career Services last week. Get the latest news and market insights delivered to your inbox. The system, which is now completing commissioning, uses Concord Blue's advanced technology that will convert waste.
