

# Mauritania base station energy storage battery

## Overview

---

The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4. Without grid support, it uses an off-grid system—combining photovoltaic power, energy storage and diesel generators—to keep base stations running stably. Project. With the technical support from the Energy Sector Management Assistance Program (ESMAP) Energy Storage Program and the Korea-World Bank Partnership Facility (KWPF), as well as financial investment support from the World Bank (IDA), the Mauritanian National Power Utility - SOMELEC - is issuing a. This project is located in Mauritania, Africa, providing an integrated power solution for local communication base stations. A total of seven equipment sets were installed. -based Energy America, and its regional subsidiary EA Astrovolt will serve as lead developer and execution partner.
