

Microgrid Research Report

1075KWHH ESS

Overview

This report describes the technical assessment of a microgrid for three research buildings at the University of Colorado's East Research Campus in Boulder, Colorado, and provides several conceptual microgrid design options. NREL is the only DOE national laboratory solely dedicated to advancing energy efficiency (EE) and renewable energy (RE) technologies and applications. Since its inception, NREL has supported both the public and the private sectors in implementing EE and RE systems and strategies to lower energy use. The global microgrid market size was estimated at USD 99.76 billion in 2025 and is projected to reach USD 406. Microgrids are localized energy systems capable of operating independently or in conjunction with the main power grid.
