

Mobile power box size

Overview

The right size depends on three simple things: what devices you want to power, how long you need them to run, and where you'll use the station. Most people need a 500-1000 watt-hour unit for camping and small emergencies, while home backup typically requires 1500-3000 watt-hours or more. That's why we've tested 22 models since 2022; some we've kept on this list, while others have been replaced by newer energy and power stations that we like even better. With many options available, it's important to understand your power needs before making a decision. Are you planning a camping trip, or do you need backup power for your home?

. Portable power stations come in a variety of sizes, typically classified into small, medium, and large categories based on their battery capacity and output wattage. Check each product page for other buying options. Made with chemicals safer for human health and the environment. Manufactured on farms or in facilities that protect the rights and/or health of workers.
