Communication between parallel packs or BMS and PC
Baud rate:9600bps

Overview

The upcoming Moldova wind and storage tender will support up to 170 MW of new onshore wind capacity combined with mandatory battery energy storage. Bid submission is expected in March 2026, with contract awards planned for June 2026. Moldova's Ministry of Energy is moving into the final drafting stage of its next renewable energy auction, following the close of public consultations in November. The auction procedures, eligibility criteria and support mechanisms today were presented at the. The Ministry of Energy of the Republic of Moldova is launching a new tender process to grant Large Eligible Producer status for onshore wind projects combined with electricity storage, and is inviting investors to a focused public consultation meeting on the draft tender documentation. Energy Minister Dorin Junghietu announced the initiative at an investors' conference in Chisinau.
