

# Morocco grid modernization

## Overview

---

Since COP22, the country has multiplied initiatives to modernize its infrastructure and increase the share of renewable energy. Morocco marks a new advancement in its energy transition with the launch of the continent's first Smart Grid platform by the National Office for Electricity and Drinking Water (ONEE). This initiative, financed by the African Development Bank. Between 2025 and 2029, the national power grid is expected to accommodate approximately 9,338 MW of new renewable energy capacity, a major step toward reducing fossil fuel dependence and strengthening energy security. Trade and Development Agency (USTDA) is watching closely. This study is being done by Africa Climate Solutions. It aims to make. A major power infrastructure project has just gone live in Morocco, as a new high-voltage transmission line connecting Sidi Bennour to Laâwamer was officially switched on this Sunday, December 28. The line, operating at 400 kilovolts and built with a double-circuit design, stretches across a. The National Office of Electricity and Drinking Water (ONEE) announced on Thursday that it has secured €300 million in new financing from the European Investment Bank (EIB), the German Development Bank (KfW), and the European Union, aimed at strengthening the national power grid.
