

Mounting height for ev charger

Overview

The NEC (National Electrical Code) mandates that chargers must be mounted at least 18 inches (450 mm) off the ground for indoor installations and 24 inches (600 mm) for outdoor setups to avoid potential damage from flooding or debris. Best practices for positioning and mounting your EV Charger securely. Find a location within the range of the home's Wi-Fi network when installing a smart charger. Consider a Wi-Fi range extender if needed. Check your local permitting office for requirements. This ensures easy accessibility and eliminates those back-breaking contortions while plugging in. Why Does Mounting Height Matter?
