

New energy storage company in west africa

Overview

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country of over 18 million people moves to strengthen its electricity grid. The West African nation, where over 60% of the population have access to electricity—one of the highest in the sub region—aims to achieve universal energy access by 2030. Africa REN invests in sustainable infrastructure such as solar power plants, storage systems, street lighting. 99 energy storage projects sprouting across West Africa like baobab trees in the savanna.
