

Ozev residential chargepoint grants

Overview

The OZEV EV chargepoint grant provides up to £350 off the cost of purchasing and installing a home charging point. The grant is available for people who live in a rented property or own a flat with dedicated. The installer will apply for the grant on your behalf if you're eligible. Your installer must either complete the work within 90 days of your application being approved, or request an extension. One of the most common questions we receive is whether a specific vehicle qualifies. In this article, we will explain everything you need to know about OZEV grants and how they work. We will review the eligibility criteria, the amount of funding available. The Office for Zero Emission Vehicles (OZEV) has confirmed the continuation of its chargepoint grants for both commercial and residential properties for the 2025/26 financial year. This extension ensures that individuals, landlords, and businesses can continue to benefit from financial support when.
