

# Paraguay s first energy storage power station

## Overview

---

The new energy storage power station in Porto Cerro represents a strategic shift toward stabilizing the national grid while supporting regional renewable energy integration. As South America's largest hydropower exporter, Paraguay faces a unique challenge - balancing seasonal rainfall patterns with year-round energy demands. This reliance underscores the need for a robust infrastructure, including efficient transmission networks and distribution systems, to leverage. From Asunción's planned digital park to a rising generation of coders, the country is courting investors and AI firms while wrestling with bureaucracy, brain drain, and the urgent need to train its young. There are only a handful of places on Earth where clean electricity is both plentiful and. 100 massive concrete blocks, each weighing as much as 10 adult elephants, dancing to the rhythm of Paraguay's electricity demand. This isn't a sci-fi movie plot - it's the revolutionary Asuncion 100 gravity energy storage project currently under construction. Unlike traditional battery farms that. Earlier this year, OPG and Northland Power proposed a first-of-a-kind project for Canada that would develop a pumped storage project at an inactive, open-pit iron ore mine. Last month, rolling blackouts affected 15% of commercial districts - but what if we could store that excess hydropower for when it's needed most?

Let's.

## Energy in Paraguay

Paraguay consumed 28,000 bbl/d (4,500 m<sup>3</sup>/d) of petroleum in 2006. It does not currently produce any crude oil. In February 2006, Paraguay's Public Works Ministry announced that oil had been discovered in the western Chaco region by British oil company CDS Energy Services, though CDS stated that the reservoir was too tight to facilitate unassisted oil production. State-owned Petr leos Paraguayos (Petropar) has a monopoly on all crude oil and petroleum product s...
