

Photovoltaic panels crush the roof

Overview

The short answer is no, solar panels generally do not damage a roof if the roof is in good condition and the installation is carried out by qualified professionals. Installation quality matters greatly - DIY attempts or inexperienced installers can cause serious damage like leaks and structural issues. This article explains common causes, how to assess damage, immediate steps, working with installers and insurers, repair options, legal remedies, and how. Most modern solar panel arrays utilize racking systems that require holes drilled directly into the roofing material. Get quotes from up to 3 pros!
