

# Photovoltaic panels installed on residential roofs in Japan

## Overview

---

To encourage the generation of renewable energy, the Tokyo Metropolitan Government introduced a regulation mandating the installation of solar panels on the roofs of new detached buildings starting in April 2025. The new regulation will require large house builders—those undertaking projects. Japan's first local regulation requiring solar panel installations on new single-family homes took effect on April 1 in Tokyo and Kawasaki in Kanagawa Prefecture. This directive is a key part of the city's comprehensive strategy to achieve net-zero carbon emissions by 2050.
