

Ranking of hydrogen energy base stations

Overview

Asia leads by a wide margin, boasting 748 active stations. Notably, South Korea added 25 stations - its third consecutive year at that pace - reinforcing its position as a major. By the end of 2023, there were 1,063 hydrogen refueling stations (HRS) in operation in 35 countries worldwide. The number of stations globally is forecast to increase to 6,080 by 2030, fueled by favorable government policies and rising demand for hydrogen-powered vehicles. Specifically, by the end of 2024, around 1,160 stations were up and running - an impressive milestone for an industry once. In 2024, around 125 new hydrogen refuelling stations were opened worldwide: 42 in Europe, around 30 in China, 25 in South Korea, 8 in Japan and 13 in North America. org, an information service of LBST GmbH. As of August 2025, there were Log in or register to access precise data. This was followed by South Korea and Japan.
