

# Roof area and solar panels

## Overview

---

Estimate how many solar panels fit your roof and the total system capacity (kW) based on roof area and panel specifications. This guide explains the idea in plain words, with examples that anyone can follow — even if maths is not your. Home solar panels are a great way to gain energy independence and reduce your utility bills and carbon footprint. Panel Count =  $(\text{Roof Area} \times (1 - \text{Spacing}/100)) / \text{Panel Area}$  This formula has been verified by certified solar engineers and complies with industry standards.
