Install the. The Austrian energy company SolarCont has developed a mobile solar container that stores foldable photovoltaic panels for portable green energy anywhere. The foldable photovoltaic panels are tucked inside a container frame with corresponding dimensions, and once they are moved and set in place. Instead of staying in one fixed position on your roof or yard, these mounts use motors and sensors to automatically adjust your panels throughout the day, keeping them perfectly angled towards the sun from morning to night. The goal is to capture every last drop of available sunlight. The POWER RAIL mounting system is designed with the professional PV solar installer in mind.
