

Rust solar and wind turbines

Overview

In Rust, you generate energy with solar panels and wind turbines. Batteries store the energy and compensate for fluctuations between day. Generating power from the wind with Wind Turbines is the most common way to generate rusticity. They are very reliable and can produce anywhere from 0rW up to 150rW. Wiring & Logic (branches, switches, sensors) decide where it goes. Once you. I tested wind turbines and solar panels for some rough (but useful) estimates on power in Rust: A 15 story wind turbine = 106 avg power, which is 14 solar panels. You need 126 power in to maintain a large battery, and 63 power for medium batteries due to.
