

# San jose smart energy storage device

## Overview

---

This smart grid project is a utility-scale sodium-sulfur (NaS) battery energy storage project. By deploying its cutting-edge advanced power flow control (APFC) technology, Smart Wires will help PG&E mitigate. Pacific Gas and Electric Company (PG&E) and the California Energy Commission yesterday unveiled an innovative battery energy storage system pilot project to better balance power needs of the electric grid. When paired with rooftop solar, excess solar energy produced by your panels can be stored for later use in batteries for backup of critical loads in your. San Jose residents benefit from a range of local, state, and federal incentives that make solar battery storage more affordable than ever: Claim up to 30% of the total system cost, including solar + battery, through the federal ITC. This credit applies whether you're installing a new solar +. Deployment of advanced power flow control technology enables 100+ MW of additional capacity, ensures efficient power distribution for critical infrastructure SAN JOSE, Calif., /PRNewswire/ -- Pacific Gas and Electric Company (PG&E) and Smart Wires today announced a new. SAN JOSE, Calif. (Febru) - San José Clean Energy (SJCE) and developer Terra-Gen are celebrating that SJCE's first long-term investment in renewable energy - a new solar and battery storage project in Kern County, California - is delivering power as of Decem(Video of Kern.
