

Shanghai energy storage equipment imports increase

Overview

Solar and storage developers face a sharp increase in equipment procurement costs from Q4 2025 onwards due to Chinese government policy changes and supply-side production cuts, which are bringing an end to the era of low prices that have characterized the market for the past 18. Solar and storage developers face a sharp increase in equipment procurement costs from Q4 2025 onwards due to Chinese government policy changes and supply-side production cuts, which are bringing an end to the era of low prices that have characterized the market for the past 18. Shanghai reported robust foreign trade figures for the first three quarters of 2025, with total imports and exports rising 5.87 billion), outpacing the national growth rate by 1.4 percentage points, according to data released by the city government. According to information shared at the forum, by the end of September 2025, China's new energy storage installed capacity had reached 103 GW, over 30 times higher than at the end of the 13th Five-Year Plan, accounting for more than 40% of the global total, ranking first in the world. The move represented. The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers push forward with larger and larger utility-scale projects.

Shanghai energy storage equipment imports increase

Thirtyfold Growth in Five Years! From China to the World, New Energy

Balancing domestic demand with global expectations, this "Shanghai dialogue" on new energy storage is writing the next chapter of the world's energy transition story.

Tesla's new Shanghai Megafactory starts exporting energy-storage

According to a statement sent to the Global Times, Tesla said that the batteries produced at the Shanghai facility will serve both the domestic and wider Asia-Pacific markets.

Global Energy Storage Growth Upheld by New Markets

The impact of very high tariffs on imports from China, where the vast majority of LFP batteries is manufactured, will reduce demand for energy storage in general in the US, but make any ...

By the end of 2025, China's new-type energy storage installations had

By the end of 2025, China's new-type energy storage installations had exceeded 130 million kW, an increase of 84% compared to the previous year and more than 40 times higher than at ...
