

Slope calculation of photovoltaic panels

Overview

Free calculator online of the slope or pitch of a roof or photovoltaic solar panels. Use the length and rise of the roof to find the slope, or enter the slope and the run length to get the tilted length. Click on the button "Erase" to clear all values. Choose Winter only if you are off-grid and need to maximize charging during short days. The average roof slope can range between 30° and 40°. Let's explore how. The table below shows the percentage of solar radiation reaching the surface depending on the angle of the panels (vertical axis) and azimuth (horizontal axis).
