

Smart Folding Container for Fire Stations in Western Europe

Overview

Mobile Emergency Units can be deployed with potential emergencies, or for preventive deployment during pre-planned activities to stationary fire protection systems. Here we are showing a 10 feet container designed and built by Van Ginkel Groep in The Netherlands. Both standard mobile containers, which are available. A container you can transport easily, assemble in just a few minutes, and adapt exactly to your needs. During transport, it comes in a flat-pack form, and on-site it easily unfolds into a fully functional container. Assembly can be done by 2-3 people in just a few minutes using a forklift or a mini. Modularity: Containers can be stacked, modified, and configured into a wide range of layouts to simulate different environments and structures. Affordability: Purchasing new or used shipping containers is a cost-effective solution compared to building permanent, dedicated training facilities from. With the MiniTec modular mobile container racks system, you can assemble individual solutions from standardised modules and a portfolio of accessory components, through to load restraint. Whether in disaster relief, firefighting operations, or civil-military deployments, these roll containers impress with their maximum stability.
