

# Solar power generation fan stopped turning

**Low Voltage  
Lithium Battery**

**6000+** Cycle Life

## Overview

---

Inverter cooling fans run when the inverter is charging a battery or loading appliances, and if there is insufficient power the fan will stop working. When your fan stops spinning on a sunny day, it can be frustrating. The good news is that most common problems are simple to diagnose and fix yourself without calling a professional. NOTE: While it's easy to skip steps or just say, "yeah, yeah. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! Invertor fan stopped working, how to clean it?

## How to Fix an Inverter Cooling Fan Not Working

Not Enough Power  
Inverter Overload / Overheating / Too Cold  
Battery Problems  
Wiring Problems  
Inverter Fan Is Damaged  
Frequently Asked Questions  
Conclusion  
Solar inverters are usually run by a battery bank or shore power. If there is not enough power getting through, the fan will eventually cease to run. Most inverter fans do not run all the time. Most of them turn on when the inverter is charging a battery. The fan also turns on when the system powers a load. Solution: make sure there is enough power.
