Overview

This Solar Energy market size expansion is anchored in utility-scale photovoltaic projects that now match or beat wholesale power prices across most sunny regions, while U. 36 billion by 2032, exhibiting a CAGR of 6% during the forecast period. North America dominated the solar power industry with a market share of 41. • The IEA. Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry. Each presentation focuses on global and U. supply and demand, module and system price, investment trends and business models, and. Solar accounted for 81% of all new renewable energy capacity added worldwide. While remaining a modest contributor to overall electricity generation for now, solar's share rose to 7% in 2024 – nearly doubling in just three years. solar market in 2025 is characterized by record installation growth coupled with significant market headwinds and shifts. As of September 2025, deployment numbers are soaring to new highs, yet industry players also face challenges like policy uncertainty, financing hurdles, and supply. The Solar Energy Market Report is Segmented by Technology (Solar Photovoltaic and Concentrated Solar Power), Grid Type (On-Grid and Off-Grid), End-User (Residential, Commercial and Industrial, and Utility-Scale), and Geography (North America, Europe, Asia-Pacific, South America, and Middle East and.
