Texas Solar Power Generation

Solar Power: Energy is Good for Texas

Solar generation in Texas has grown substantially over the past decade, with progressively larger solar farms being constructed and coming online, increasing the state's solar capacity.

Texas Leads U.S. Renewable Energy Growth , TxEDC

Texas leads the nation in both wind-powered electricity generation and utility-scale solar capacity. In 2024, the state added approximately 9,700 megawatts of solar and 4,374 megawatts of ...

Solar Power Production in Texas , Clean Energy Leader

Discover how Texas leads the U.S. in solar power production, driving clean energy growth, lowering costs, and creating a sustainable future.

Utility-scale solar shines in

Texas despite tariffs, federal policy

Texas is now the top state for utility-scale solar power generation capacity. However, developers of new solar projects face a changing operating environment, one lacking strong federal

...

Texas makes clean power breakthrough as solar output overtakes coal

LITTLETON, Colorado, Dec 9 (Reuters) - For the first time, Texas' main power system looks set to generate more power from solar farms than coal plants during a calendar year in 2025, marking

Solar capacity additions are changing the shape of daily electricity

Although wind power remains the largest source of renewable power in the state, the installation of new wind turbine capacity slowed in 2023, while additions of solar generating capacity, ...

Solar in Texas

The Texas solar industry employs over

12,000 Texans and is contributing billions in local tax revenue and landowner income, and solar and storage are the biggest sources of new energy on the Texas grid.

Solar power in Texas

Solar power in Texas, a portion of total energy in Texas, includes utility-scale solar power plants as well as local distributed generation, mostly from rooftop photovoltaics.

Texas Solar Breaks 17 Records, Stabilizes Grid in 2025

Texas hit a major renewable energy milestone during summer 2025. Solar generation broke 17 records, and battery storage set four discharge records in September alone. For the first ...

Texas Leads U.S. Renewable Energy Generation by a ...

Texas widened its lead as the country's renewable energy leader in 2024, with growth in solar and wind power,

according to federal data.
