

The newly replaced generator has a serious whistle sound

Overview

A hissing or whistling sound coming from the exhaust system is a tell - tale sign of a leak. Loose Exhaust Connections: The exhaust pipes and joints in a diesel generator can become loose over time due to vibrations and thermal expansion. It's normal for a generator to produce noise, but a generator producing loud, strange operational noises isn't normal. Continue reading to understand the common causes behind these sounds and learn how to respond to restore your generator. These signs often mean it needs attention. Regular checks can help prevent bigger issues later.
