

# The price of bifaciality of solar modules

## Overview

---

Current pricing ranges from \$0.50 per watt for modules alone. Meanwhile, complete installed systems cost \$3. Here's where bifacial solar panels residential projects often fail: traditional rooftop installations. When panels. This article will delve into the concept of bifacial solar panels, the different types available in the market, the factors influencing power generation gain, cost-benefit analysis, and their extensive application scenarios. Experts think it will grow to \$19.6 billion by 2035, at a CAGR of 9.
