This article introduces the development process and main characteristics of China's Hainan Free Trade Port (Hainan FTP) and analyses the risks and challenges China Customs may encounter in matching the high-standard international economic and trade rules in promoting its. HAIKOU, May 30 (Xinhua) -- In June 2020, China released a master plan to build the whole of Hainan Island into a globally influential and high-level free trade port by the middle of the century. Many favorable policies have since been issued to support the development of the Hainan Free Trade Port. As China's largest special economic zone, Hainan is uniquely positioned to further all-round reform and experiment with the highest level of opening-up policy. The island-wide special customs operations describe one of the world's most forward-looking systems of trade liberalization, designed to combine regulatory precision with unprecedented openness. This study clarifies the concept of the free trade port and analyzes it from a trade perspective. Our empirical results show that the construction of the free. The high specification of the cabinet means it's suitable for almost any data comms or voice networking installation.
