Transmission node uses network cabinet IP54

Overview

Here are a few examples of IP ratings and their common uses: IP54: Often used in traffic signal cabinets to protect sensitive electrical components from rain and splashing water. IP55: Built to handle windblown dust and light water ingress in exposed environments. Rack enclosures are rated based on their suitability for certain applications and the degree to which they protect equipment. In our range, you will find a wide selection of different models - from a simple wall-mounted enclosure to complex industrial cabinets. As industries advance toward heightened automation and stricter safety. The RCAB-OD-4535 is an outdoor cabinet system for active and passive equipment that provides maximum protection of customer's equipment against vandalism and extreme weather conditions. This cabinet is the ideal solution.
