Overview

Industry estimates indicate that Ukraine installed about 1.5 GW of new solar PV capacity in 2025, up significantly from around 800 MW added in 2024. 5 GW by year-end, demonstrating robust growth despite. More distributed solar power in Ukraine is urgently needed to secure electricity in Ukraine, according to the IEA. [1] During the 2022 Russian invasion of Ukraine, the Merefa solar energy plant in the Kharkiv region was destroyed by Russia; [2] damage was also reported at the Tokmak solar energy. Amid constant blackouts and strategic targeting of energy infrastructure, solar energy solutions are emerging as a crucial tool for resilience. Ukraine plans to build 94 gigawatts of solar power capacity by 2050. This ambitious goal shows the country's commitment to clean energy and energy independence.

Ukraine uses solar power to generate electricity

Ukraine's first completed solar-powered critical infrastructure project

Amid Russia's continued attacks on Ukraine's energy infrastructure, solar power has the potential to fill a vital energy gap, contributing to the creation of a more reliable, decentralised and ...

8 Solar & Wind Energy Projects Transforming Ukraine's Future

Wind farms and solar projects are already changing how Ukraine generates electricity. This guide explores eight groundbreaking renewable energy projects across Ukraine. You'll discover how solar ...

Ukraine Deploys ~1.5 GW of Solar in 2025, Accelerating Battery ...

In 2025 Ukraine deployed around 1.5 GW of new solar capacity driven by strong interest in co-located battery energy storage systems. BasenPower breaks down the key drivers, policy ...

Ukraine has seen success in building clean energy, which is harder for

Whatever the future, the decentralized nature of some clean energies, in particular wind and solar, has allowed Ukraine to quickly restore power in ways that would be impossible with Ukraine's more ...

Renewable energy

In 2023, Ukrainian businesses invested around USD 150 mln in solar energy. The plan is to reduce greenhouse gas emissions to 35% of the 1990 level and achieve carbon neutrality by 2060 by ...

Keeping the lights on: How Ukraine can build a resilient energy system

Over 40% of Ukraine's pre-2022 RES in solar PV and wind power currently lies in occupied territory. Wind generation capacity, once concentrated in the now occupied regions of ...

SNAPSHOT: UKRAINIAN RENEWABLES MARKET

Ukraine's National Renewable Energy Action Plan, adopted in August 2024, sets renewable energy targets of 27% of electricity consumption and 25% of generation (2022: 14.3%), to be achieved by ...

How Solar Energy Is Powering Hope in Ukraine

Ukraine is actively pivoting toward decentralized energy systems, including microgrids and community solar, to reduce vulnerability. By enabling households to generate their own electricity, ...

How Solar Power Is Helping In Ukraine

The humanitarian organization, Hope for Ukraine, is expanding its solar power and electric cookstove program to help Ukrainians in need to be able to cook food.

Solar power in Ukraine

Households in Ukraine tend on average to have larger rooftop solar PV systems than in other countries. The feed in tariff

is available for larger systems and from 2020 may be up to 50 kW and can be both ...
