

Use solar energy to generate electricity for home use

Overview

Photovoltaic systems are the most popular for residential electricity generation, utilizing solar panels to convert sunlight directly into electricity. These panels are composed of silicon and other materials that create an electric field. Since 2008, hundreds of thousands of solar panels have been installed across the country as more and more Americans choose solar energy for their daily lives. Think of it like managing a household. Imagine harnessing the sun's energy to power your home, charge your devices, or even run your RV off the grid. Government incentives, like tax credits and rebates, make solar installation more.
