

Vienna makes solar panels

Overview

The citizens' power plants project launched by Vienna's municipal energy provider Wien Energie allows everyone to participate in the development of eco-friendly electricity generated by solar photovoltaic panels. Over 1,500 new solar power installations have gone online over the past six months, helping fulfil the needs of 57,500 households in Vienna. Vienna has already met its target for expanding solar energy systems in 2024, according to a press statement released by the city government on Monday. Especially in cities, where the majority of the population live in rented. In Austria, people living in apartment blocks are increasingly playing their part in generating electricity. by putting solar panels on their balconies. With ambitious government targets and growing consumer demand, the Austrian solar sector continues to expand rapidly.
