

# What are the energy storage charging stations in Spain

## Overview

---

- As of 2025, Spain has around 31,000 public charging points.
  - Fast chargers (DC  $\geq$ 50kW) account for ~13% of total stock (~4,000 units).
  - Leading operators include Iberdrola, Endesa X, Repsol, Zunder, Wenea, and Tesla.
- What are the energy storage power stations in Spain?

Energy storage power stations in Spain play a significant role in the country's transition towards a more sustainable and flexible energy system. These facilities help balance supply and demand, 2. support the integration of renewable energy. List of charging stations for electric vehicles in Spain. 8 million in 2025 to USD 3,320. With over €1 billion in planned investments and more than 30,000 public charging points as of 2025, Spain is well-positioned to become a southern. Spain's electric vehicle charging infrastructure has undergone a remarkable transformation, with the network exploding from 27,420 operational points in November 2023 to 46,684 by May 2025 - a staggering 70% increase in just 18 months that positions the country among Europe's most aggressive EV.
