

What to do if the solar power controller displays e1

Overview

Try this simple troubleshooting step: disconnect the solar panels and the battery, and then power the charge controller using another 12-volt battery for about 4 minutes. Common. It's currently displaying an E01 error, even though my battery is charged and all the voltages seem normal. The combination of flashing LEDs identifies the code. However, you should really only consider this an error code if the charge controller is not. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off!

Hello! I was just finishing wiring up my roof fan and when I put the fuse into the fuse board it tripped the power and the MPPT (Renogy Rover 20a) hasn't worked since. I am charging it back up in the sun- do I need to reset the controller?

: r/VanLife Has anyone gotten an E1 error. We have this solar system on our 2023 Sunseeker 3270. Also only the up and down arrows.
