

What to do if there are stains on the photovoltaic panels

Overview

To clean solar panels, start by turning off the system for safety. Then, remove any loose debris with a brush or leaf blower. Removing built-up hard water stains requires some gentle scrubbing with an acidic cleaner to dissolve the minerals. With the right materials and proper technique, you can safely rid your solar panels of hard water stains and restore their productivity. How Often Should You Clean Solar Panels?

What Happens If You Never Clean Solar Panels?

Solar panels use photovoltaic (PV) cells to capture. Understanding how to properly manage solar panel maintenance, especially in the face of stubborn stains, is critical for anyone relying on solar energy.
