

When will Saudi Arabia build a hydrogen energy station

Overview

From the end of 2026, the \$8.4B project – a joint venture owned equally by ACWA Power (a Saudi listed power generation developer and investor), Air Products (global supplier of industrial gases) and NEOM (PIF-backed developer of the futuristic megacity) – will be the world's. From the end of 2026, the \$8.4B Yanbu Green Hydrogen Hub, developed by ACWA Power in partnership with Germany's EnBW, is expected to be nearly twice the size of the ongoing 2. This new site will. The US company is a partner in the Neom green hydrogen project. A partner in Saudi Arabia's \$8 billion Neom green hydrogen complex has said the project is nearing completion and negotiations on a major ammonia export deal are in its final stages. The Kingdom of Saudi Arabia is fast-tracking the progress at the world's most futuristic city, as it has now passed the 80% completion mark. Located in Oxagon, NEOM, the facility integrates a wind garden, solar farm, transmission grid, and hydrogen production.
