

# Wind power generation area in 2025

## Overview

---

As a result of new solar projects coming on line this year, we forecast that U.S. solar power generation will grow 75% from 163 billion kilowatt-hours (kWh) in 2023 to 286 billion kWh in 2025. A total of 72,2 gigawatts (GW) of new capacity were added between January and June 2025, following 44,1 GW installed in the first half of the year. Annual electricity generation from wind is measured in terawatt-hours (TWh) per year. This includes both onshore and offshore wind sources. With technological advancements, new energy storage strategies, and the expansion of offshore wind power, 2025 is set to be a year of significant transformations in the sector. Below, we highlight the key insights that will shape this market in the coming years.

## Wind power generation area in 2025

---

### WWEA Half-year Report 2025: Global Wind Power Growth ...

The first half of 2025 has been a defining period for the global wind energy sector - not only for its record-breaking growth but for the clarity it provides about the world's energy direction.

### US Wind Energy Monitor , Q2 2025 , ACP

The U.S. Wind Energy Monitor is an indispensable resource for industry players who refuse to be caught off-guard by rapid changes. With our expert analysis at your fingertips, you can confidently chart your ...

### Renewable energy statistics 2025

Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy balances for over 150 countries and areas for ...

## Map: Projected Growth of the Wind Industry From Now Until 2050

See the projected growth of the wind industry over the next 35 years. All units are in gigawatts (GW). Only states with total capacity over 0.1 GW are included per year. Find out more about the data by ...

## U.S. Wind Power 2025: Capacity, IRA, Renewable Growth

U.S. Wind Power 2025 drives record capacity additions, with FERC data showing robust renewable energy growth, IRA incentives, onshore and offshore projects, utility-scale generation, grid ...

## GWEC'S Global Wind Report 2025: Record Growth, Emerging ...

The 2025 Global Wind Report shows global wind capacity reaching 1,136 GW, with 55 countries adding new turbines in 2024. China led new installations, followed by the USA, Germany, ...

**the future of wind energy:  
insights from the gwec global**

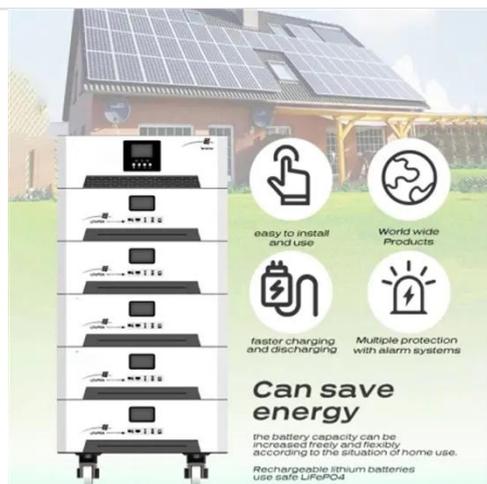

## wind report 2025

In this blog, we explore key findings from the report alongside our 2025 market predictions to offer a forward-looking view of the wind energy sector, where it stands today and what's next.

### Solar and wind to lead growth of U.S. power generation for the next ...

We expect that wind power generation will grow 11% from 430 billion kWh in 2023 to 476 billion kWh in 2025. In 2023, the U.S. electric power sector produced 4,017 billion kilowatthours ...

### Wind power generation, 2025

Wind power generation, 2025 Annual electricity generation from wind is measured in terawatt-hours (TWh) per year. This includes both onshore and offshore wind sources.

### The future of wind energy in 2025: Key trends and challenges ahead

The wind energy sector in 2025 will

continue on a growth trajectory, with technological innovations, offshore wind expansion, and advancements in digitalization and storage. However, it ...
