

Wind power has the largest amount of electricity

Overview

2% of electricity in the United States. (BP / Ember / EIA) What country produces the most wind energy?

China (650. Wind currently provides 9. Offshore wind turbines are the largest of all, and can harness powerful ocean winds and generate very large amounts of electricity. Data source: Ember (2026); Energy Institute - Statistical Review of World Energy (2025) - Learn more about this data Measured as a percentage of total electricity produced in the country or region. Ember (2026); Energy. 6. Global wind power capacity now stands at over 743 GW. In the US, the figure is higher than it is globally.

Wind power has the largest amount of electricity

Wind power by country

China, with 145,362 MW of installed capacity, is the world's largest generator of electricity from wind energy. India is the second largest in Asia with an installed capacity of 25,088 MW. [6]

Wind Power Facts and Information , ACP , ACP

Utility-scale wind energy is the largest source of renewable electricity generation in the United States, providing 10% of the country's electricity and is continuously growing.

Share of electricity production from wind, 2025

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

Wind Energy , Department of

Energy

Wind power is the nation's largest source of renewable energy, with more than 150 gigawatts of wind energy installed across 42 U.S. States and Puerto Rico. These projects generate ...

Wind Power by Country 2026

Offshore wind turbines are the largest of all, and can harness powerful ocean winds and generate very large amounts of electricity. Modern wind turbines can generate electricity at wind speeds as low as ...

Global cumulative installed capacity of wind power 2024, Statista

China is by far the largest installer of wind power in the world, more than tripling the second-ranked United States. As of the end of 2024, China had cumulatively installed over 561 ...

Wind electricity generation by country, around the world

The average for 2022 based on 189 countries was 11.16 billion

114KWh ESS

ISO 9001 ISO 14001 PICC RoHS CE MSDS UN38.3 UK CA IEC

kilowatthours. The highest value was in China: 762.67 billion kilowatthours and the lowest value was in Afghanistan: 0 billion kilowatthours. ...

Wind power , Description, Renewable Energy, Uses, Disadvantages

China and the United States possessed the greatest amount of installed wind capacity in 2021 (with nearly 329 gigawatts and almost 133 gigawatts, respectively), and that same year ...

Global Statistics

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...

13 Compelling Wind Energy Statistics & Facts (Updated 2026)

Which country gets the biggest share of

its electricity from wind? Denmark (47.9%) generated the most wind energy as a percentage of its overall consumption in 2021.

Wind power by country

China, with 145,362 MW of installed capacity, is the world's largest ...

13 Compelling Wind Energy Statistics & Facts (Updated 2026)

China is by far the largest installer of wind power in the world, more than tripling the second-ranked United States. As of the end of 2024, China had ...
